

"My husband and I bought 'Shattering the Glass Slipper' for our godson. I wanted to read it myself before I sent it to him. I LOVE the book and would like to get other copies to give as graduation gifts. I have thought of ordering extra copies to lend to patients (and their parents) from my medical practice. I provide medical care for teens and young adults, and I have so many patients who would benefit from the wisdom found in this book."
